WEB-BASED ML MODEL EVALUATOR

Unit Test Report

Project	Web-Based ML Model Evaluator (Team SE-Jackfruit)
Backlog item	BL-14 - Unit Test Report and System Validation Report
Test run	4 November 2026, 20:50 IST
Source of results	docs/test-results/pytest-verbose.txt and docs/test-results/junit.xml

1. Purpose and scope

This report gives the results of the unit tests of the Web-Based ML Model Evaluator. A unit test runs one piece of the program (a service function) on its own, without the web server, and checks its result. The goal is to show that each building block works before it is combined with the others.

In this project the unit-level tests are in three files that call the service code directly: **test_model_service** (model upload and validation), **test_dataset_service** (dataset upload and validation) and **test_evaluation_service** (task selection, compatibility check and metric calculation). The remaining test files drive the running application over HTTP and are reported as integration and system tests in the System Validation Report. The results of every test file are listed in section 4 so nothing is left out.

2. Test environment and method

Item	Detail
Environment	Windows, Python 3.14.6, pytest 9.1.1, run from the backend folder on 4 November 2026 at 20:50 IST
Test framework	pytest 9.1.1
Command	python -m pytest tests -v -p no:cacheprovider --junitxml=junit.xml
Isolation	Every test runs with its own empty temporary database and upload folders, so tests do not depend on each other and never touch real user data.
Real files	Tests use real scikit-learn model files and real CSV files. Nothing is replaced by mocks.
Test plan link	Test names contain the plan IDs (for example 04_UT_01). The full plan is in documents/Web_Based_ML_Model_Evaluator_Test_Cases.pdf.

3. Summary of results

	Tests run	Passed	Failed	Time (s)
Unit tests (3 files)	70	70	0	8.9
All tests in the suite	219	219	0	56.9

All 70 unit tests passed (59 test functions; some functions run several times with different inputs, for example each unsupported file type). The whole suite of 219 tests also passed with no failures, errors or skipped tests.

4. Results by module

Level: unit = calls service code directly; integration = several parts together through the web application; system = complete workflows and limits.

Test file	What it checks	Level	Tests	Passed	Failed
test_model_service.py	Model upload and validation (UC-04)	unit	17	17	0
test_dataset_service.py	Dataset upload and validation (UC-03)	unit	23	23	0
test_evaluation_service.py	Task selection, compatibility and metrics (UC-05, UC-06)	unit	30	30	0
test_auth.py	Registration, login, sessions, CSRF (UC-01, UC-02)	integration	42	42	0
test_admin.py	Admin accounts, roles, audit log (UC-12, UC-13)	integration	27	27	0

Test file	What it checks	Level	Tests	Passed	Failed
test_isolation.py	Per-user data isolation (MLE-NF-002)	integration	10	10	0
test_compatibility_at_upload.py	Compatibility shown when a file is validated	integration	5	5	0
test_charts_compare_reports.py	Charts, history, comparison, PDF reports (UC-07 to UC-11)	integration	31	31	0
test_api_workflow.py	Upload to evaluate workflows and error handling over HTTP	system	23	23	0
test_app.py	Pages and static files	integration	8	8	0
test_performance.py	50,000-row performance (MLE-NF-001)	system	3	3	0
Total			219	219	0

5. Unit-level cases from the test plan

The test plan marks unit-level cases with UT in their ID. The table shows each one with the pytest test that checks it and the result of this run.

Case	Description	Automated test (file::function)	Result
01_UT_01	Blank required fields are rejected	`test_auth::test_01_UT_01_blank_required_fields_are_rejected`	**Pass**
01_UT_02	Invalid email and short password are rejected	`test_auth::test_01_UT_02_invalid_email_is_rejected` `test_auth::test_01_UT_02_short_password_is_rejected`	**Pass**
01_UT_03	Duplicate email is rejected (ignoring letter case)	`test_auth::test_01_UT_03_duplicate_email_is_rejected_ignoring_case`	**Pass**
01_UT_04	Mismatched password confirmation is rejected	`test_auth::test_mismatched_password_confirmation_is_rejected`	**Pass**
02_UT_01	Blank login fields are rejected	`test_auth::test_02_UT_01_blank_login_fields_are_rejected`	**Pass**
02_UT_02	Wrong password and unknown email give the same message	`test_auth::test_02_UT_03_wrong_password_and_unknown_email_give_the_same_message`	**Pass**
03_UT_01	CSV accepted, other file types rejected	`test_dataset_service::test_03_UT_01_csv_dataset_is_accepted` `test_dataset_service::test_03_UT_01_unsupported_dataset_formats_are_rejected`	**Pass**
03_UT_02	Corrupt dataset is rejected with a reason	`test_dataset_service::test_03_UT_02_corrupt_dataset_is_rejected` `test_api_workflow::test_03_IT_02_corrupt_dataset_is_rejected_with_a_reason`	**Pass**

03_UT_03	Target column must be given and must exist	`test_dataset_service::test_03_UT_03_target_column_must_be_specified`
		`test_dataset_service::test_03_UT_03_target_column_must_exist_and_error_lists_columns`
		`test_api_workflow::test_03_ST_02_dataset_upload_without_a_target_is_rejected`
			Pass

03_UT_04	Row limit: 50,000 accepted, 50,001 rejected	`test_dataset_service::test_dataset_exactly_at_row_limit_is_accepted` `test_dataset_service::test_dataset_over_row_limit_is_rejected`	**Pass**
04_UT_01	Only .pkl and .joblib models are accepted	`test_model_service::test_04_UT_01_supported_model_formats_are_accepted` `test_model_service::test_04_UT_01_unsupported_model_formats_are_rejected`	**Pass**
04_UT_02	No file or empty file is rejected	`test_model_service::test_04_UT_02_no_file_selected_is_rejected` `test_model_service::test_empty_model_file_is_rejected`	**Pass**

04_UT_03	Size limit: 100 MB accepted, above 100 MB rejected	`test_model_service::test_model_exactly_at_size_limit_is_accepted`
		`test_model_service::test_model_over_size_limit_is_rejected`
		`test_api_workflow::test_oversized_upload_returns_413_json`
			Pass

05_UT_01	Classification and regression accepted; unknown task rejected	`test_evaluation_service::test_05_UT_02_classification_task_is_accepted`
		`test_evaluation_service::test_05_UT_03_regression_task_is_accepted`
		`test_evaluation_service::test_unknown_task_type_is_rejected`
			Pass

06_UT_01	Classification metrics match hand calculation	`test_evaluation_service::test_06_UT_03_classification_metrics_match_hand_calculation` `test_evaluation_service::test_classification_result_contains_exactly_the_defined_metrics`	**Pass**
06_UT_02	Regression metrics match hand calculation	`test_evaluation_service::test_06_UT_03_regression_metrics_match_hand_calculation` `test_evaluation_service::test_regression_result_contains_exactly_the_defined_metrics`	**Pass**
06_UT_03	ROC-AUC skipped with a note when the model has no probabilities; multiclass supported	`test_evaluation_service::test_roc_auc_is_skipped_with_a_note_when_model_has_no_probabilities` `test_evaluation_service::test_multiclass_classification_reports_roc_auc`	**Pass**
07_UT_01	Evaluation page shows the right metrics for the task	`test_charts_compare_reports::test_07_UT_01_evaluation_page_shows_metrics_and_charts` `test_charts_compare_reports::test_regression_evaluation_page_shows_only_regression_metrics`	**Pass**
07_UT_02	Missing evaluation gives a message, not a crash	`test_charts_compare_reports::test_07_UT_02_missing_evaluation_gives_a_message_not_a_crash`	**Pass**

Case	Description	Automated test (file::function)	Result
08_UT_01	Classification shows confusion matrix and ROC curve	`test_charts_compare_reports::test_08_UT_01_classification_gets_confusion_matrix_and_roc_curve` `test_charts_compare_reports::test_08_UT_02_each_available_chart_renders_a_png`	**Pass**
08_UT_02	Regression shows residual and predicted-vs-actual plots	`test_charts_compare_reports::test_08_UT_03_regression_gets_residual_and_predicted_vs_actual_plots`	**Pass**

09_UT_01	Fewer than two evaluations cannot be compared	`test_charts_compare_reports::test_comparing_fewer_than_two_evaluations_is_refused`
		`test_charts_compare_reports::test_comparing_the_same_evaluation_twice_counts_as_one`
		`test_charts_compare_reports::test_comparing_with_a_missing_evaluation_is_refused`
			Pass

10_UT_01	History is empty for a new user	`test_charts_compare_reports::test_10_UT_03_history_starts_empty`	**Pass**
10_UT_02	History lists newest first	`test_charts_compare_reports::test_10_UT_02_history_lists_newest_first`	**Pass**
11_UT_01	Single-evaluation PDF report	`test_charts_compare_reports::test_11_UT_01_single_evaluation_report_is_a_pdf` `test_charts_compare_reports::test_report_embeds_every_chart_as_an_image`	**Pass**
11_UT_02	Multi-evaluation PDF covers all selected evaluations	`test_charts_compare_reports::test_11_UT_02_multi_evaluation_report_covers_all_of_them`	**Pass**
11_UT_03	No selection gives a message	`test_charts_compare_reports::test_11_UT_03_no_selection_gives_a_message`	**Pass**
12_UT_01	Admin sees all accounts with status and role	`test_admin::test_12_UT_01_admin_sees_all_accounts_with_status_and_role`	**Pass**
12_UT_02	Admin can suspend and reactivate an account	`test_admin::test_12_UT_02_admin_can_suspend_and_12_UT_03_reactivate`	**Pass**
13_UT_01	Admin can promote an Analyst to Admin and back	`test_admin::test_13_UT_03_admin_can_make_an_analyst_an_admin_and_back`	**Pass**

30 unit-level plan cases: 30 pass, 0 fail. Unit cases for registration, login, charts and reports are exercised through the application (their tests are in the integration files) and are included here because the plan classes them as unit-level checks.

6. Defects and observations

Defects found: none. No test failed, errored or was skipped in this run.

Run time: the suite took 56.9 s on this machine (an earlier run on another machine took about 22 s). Every test passed and the timing limits of the performance tests were not exceeded.

Limits of these tests: unit tests show that each function behaves correctly for the inputs tested. They do not by themselves show that the whole system meets the requirements; that is covered in the System Validation Report. Code and branch coverage (how much of the code the tests reach) is reported separately in the coverage reports (BL-15).

7. Conclusion

The unit tests of model handling, dataset handling and evaluation all pass (70 of 70), and so does the complete suite (219 of 219). The building blocks of the system work as specified in the test plan, and the system is ready for the system validation described in the next report.

Appendix A. Result of every test function

Each row is one test function. 'Runs' is greater than 1 where pytest runs the same function with several inputs. All rows passed.

Test file	Test function	Runs	Time (s)	Result
test_admin	test_analyst_cannot_use_admin_api	2	0.29	**Pass**
test_admin	test_analyst_cannot_open_admin_pages	2	0.23	**Pass**
test_admin	test_analyst_cannot_change_roles_or_statuses_by_calling_the_api	1	0.16	**Pass**
